Rebecca Cavanaugh, MN, RN, NCSN	PSESD, Renton, WA
Robin Fleming, PhD, RN, NCSN	OSPI, Olympia, WA

Special thanks to Loral Gray who led the work on this guide and to Nancy Hoffman, NWESD 189, School Nurse Corps Administrative Assistant.

## INTRODUCTION/PURPOSE

This guide is provided by the Washington State School Nurse Corps (SNC) to school districts in Washington State. It is intended for use by school nurses and district administration to assist in the compliance of state health training for school staff.

This is not an official Office of Superintendent of Public Instruction (OSPI) document and serves only as a guide, not a legal interpretation of required school staff health training. Schools are urged to review their current policy and procedure associated with school health trainings as well as consult with their school nurse and district legal counsel or risk management staff for specific questions related to the implementation of the RCW's, WAC's, or rules referred to in this guide.

Please check with your school nurse and risk management personnel annually for possible changes or updates to topics, content, or frequency of staff health training. As this guide is not intended to be a comprehensive listing of all trainings schools are required to provide, utilize appropriate district or risk management personnel as a training resource.

## SPECIAL CONSIDERATIONS

### ONLINE TRAINING

The SNC and OSPI Health Services do not have formal guidance regarding online training for districts to use to comply with school health services state statutes. There are, however, some important considerations when looking at online training options. Online training:

- Could partially meet school district compliance for mandated staff training for such requirements as general asthma training for staff;
- Must still be combined with in-person RN training for all Individual Health Plans (IHPs), Emergency Care Plans (ECPs), and delegated skills related training (for example: emergency epinephrine, and other medication administration training, etc.);
- Should include imbedded testing throughout the training to assure that staff work their way through the training;
- Should include nurse availability to answer questions;
- Should be supported by an electronic trainee roster; and,
- Must be updated by experts on a regular basis to reflect current knowledge, practice, and standards of care.

“If a video or online training media is used, it is recommended that a school nurse is present or identified as a resource for staff to direct questions and/or concerns.”

Source: OSPI *Guidelines for Care of Students with Anaphylaxis* (March 2009)

## TRAINING LEVELS

A few of the training topics listed in this guide require two levels of training.

### General Training -

General level training is required for school staff **indirectly** involved with the student. This training may include office staff, building administrators, athletic personnel/coaches, bus drivers, custodians, cooks, teaching staff, paraprofessionals, playground attendants, and others deemed appropriate by the school registered nurse. Please see specific requirements per individual law for trainer qualifications and training content.

### Intensive Training –

Only the school registered nurse can conduct intensive, student specific training for staff **directly** responsible for implementing the student's IHP or ECP. This training may include teacher(s), office staff, coaches, paraprofessionals, cooks, and others deemed appropriate by the school registered nurse.

Refer to specific topic requirements to determine the appropriate training level.

## OSPI UNIFORM TRAINING POLICIES

Please refer to OSPI's uniform staff training policy for:

1. [Students with Asthma \(September, 2008\)](#)
2. [Students with Diabetes \(May, 2005\)](#)

## ACRONYMS

AE-C = Asthma Educator, Certified  
AED = Automated External Defibrillator  
AIDS = Acquired Immune Deficiency Syndrome  
ARNP = Advanced Registered Nurse Practitioner  
CAE = Certified Asthma Educator  
CPR = Cardiopulmonary Resuscitation  
DO = Doctor of Osteopathy  
ECP = Emergency Care Plan  
ESD = Educational Service District  
ESS = Engrossed Substitute Senate Bill  
HIV = Human Immunodeficiency Virus  
IHP = Individual Health Plan  
LHCP = Licensed Health Care Provider  
MD = Medical Doctor  
OSHA = Occupational Safety and Health Administration  
OSPI = Office of Superintendent of Public Instruction  
RCW = Revised Code of Washington  
RN = Registered Nurse  
RRT = Registered Respiratory Therapist  
SNC = Washington State School Nurse Corps  
SNOW = School Nurse Organization of Washington  
WAC = Washington Administrative Code  
WASBO = Washington Association of School Business Officials  
WIAA = Washington Interscholastic Activities Association  
WISHA = Washington Industrial Safety and Health Act  
WSSDA = Washington State School Directors Association
